The Common Notes and Movable Feasts according to the Julian Account used in England.

The Golden Number	7	Hilary Term begins
The Dominical Letter	Æ	Jan. 23, ends Feb. 12
The Epistle	7	Easter Term begins
Shrove Sunday	Febr. 16.	April 23, ends May 19
Easter-day	April 6.	Trinity Term begins
Ascension-day	May 15.	June 6, ends June 25
Whit-Sunday	May 25.	Michaelmas Term begins
Advent Sunday	Nov. 30.	Octob. 23, ends Nov. 28

Note, The Roman Account since the Year 1700, is 11 days before us in England, their 12th being our first; and our last their 11th; and thus you are to understand the two Accounts, always reckoning the Foreign Account when you read the News, to be eleven days before us; as for example: *Paris, June the 27th*; this is but the 16th with us. And so observe in all the rest.

Note, That the Exchequer opens eight days before any Term begins, except Trinity Term, before which it opens but four days. Observe also, that the first and last days of every Term are the first and last days of Appearance.

Within the Revolution of the Year 1735, there will be four *Eclipses* two of the *Sun*, and two of the *Moon*: They happen as followeth.

The first is of the *Moon*, *March* the 27th, about 11 in the Morning; therefore invisible here.

The second is of the *Sun*, *April* the 11th, about Midnight; consequently not to be seen here.

The third is of the *Moon*, *Sept.* 21, about 1 in the Morning: It begins 12 min. after Midnight: The Middle, 29 min. after 1 in the Morning: The End, 47 min. after two: Digits Eclipsed 5 and an Half.

The fourth and last is of the *Sun*, *Oct.* 5, about two in the Morning; and therefore not to be seen of us.

A Table of all the **KINGS** of *England* since it
was so called by King **Egbert**, to this Year 1735.

On the Twelve Signs.

The Princely *Ram*, clad in his golden Wool,
Looks back admiring to behold the *Bull*
Against him rise, who with a chearful Face
Calls to the *Twins*, to bid them mend their pace
The *Crabb* these follows, and the *Lion* then;
Next the *Celestial Maid*, (not known by Man)
Libra comes after, who (lest time should fail)
Weighs out the Days and Nights in equal Scale,
And calls the *Scorpion* on, who in his Train
Bears a bright fulgent Star, at which (in vain)
The *Centaur* (with his String drawn to his Ear)
Arms his keen Shaft; the *Goat* doth next appear,
That's *Capricornus* call'd, who oft-times lowers,
Because to quench his Star *Aquarius* pours
His Laver forth; next after him be plac'd
Pisces, which of the twelve Signs is the last. *Manil. l. i. c.*

Rose-trees, Peaches, Philbeards, and Plum-trees; if the Frosts be not too hard, prune and lop them: Before full Moon sow and set Beans and Pease, and dung land. In the last quarter geld Cattle to rear, fallow Land for Wheat and Rye, trench Gardens with Dung, and remove Bees: And for your own Health keep your Body warm; let good and wholesome Diet be your Physician, moderate Exercise and Labour your Sauce to cause Appetite.

FEBRUARY Observ. Sow all sorts of Pease and other Pulse; sow Mustard-seed, cast up Dykes, set and plant Vines, Hops, Gooseberries, and any Fruit that grows upon Bushes; prune and trim all sorts of Fruit-trees from Moss, Canker, and all superfluous Branches: graft in the latter end of the Month, sow Onions in cold stiff Land, take heed of Cold, forbear Phlegmatick Meats.

In the New of the Moon (the Wind being any way *South* or *West*) graft Pears, Wardens, or Apple-trees; make an end of sowing all manner of Pulse, and begin to sow Oats, Barley, Parsnips, Onions, Carrots, Cucumbers Melons, and all kind of Pot-herbs; slip Artichoaks and Sage; geld Lambs, let Blood according to strength, and necessity, the Sign and Weather being also fit (but repair to the learned Physician) look what cannot be cured in the Spring by Physick, will hardly be cured all the Year after.

APRIL Observ. Sow Barley, Hemp and Flax, pole Hops, set and sow all kind of Garden Herbs, open Hives, and let Bees labour for their living; let Tanners now provide themselves with Bark, and all good Housewives look to their Daries; bleed and purge with Advice: Those that are troubled with Aches or the Gout, let them go to the Bath in this or the three following Months.

OCTOBER Observ. Sow Wheat and Rye, the sooner the better, for fear of Rain, set Acorns and Nuts, gather Winter Fruits, the Weather dry in the Afternoon, and in the wain of the Moon cut Rose-trees; if you desire to have store of Roses, do this once in two Years; refuse not any needful Physick at the Hands of the Learned, and use all moderate Sports to revive the vital Spirits.

A Description of the 4 Quarters of the Year; and 1st of Winter.
Sol in Capricorn, Aquarius, Pisces.

ACcording to the Custom of Writers in this kind, *Winter* quarter is the first quarter, which took beginning the 10th day of *Decemb.* at which time the Sun enter'd into the first degree of the cold and dry Sign *Capricorn*, being the most remote from us, in his farthest *South* Declination, causing the Days with us to be shortest, and the Nights longest. This quarter continues until the Sun hath slowly passed thro' *Capricorn, Aquarius & Pisces*, & doth naturally resemble *Old Age*.

Of the Spring. Sol in Aries, Taurus, Gemini.

THIS quarter takes beginning near the 10th of *March*, at which time the Sun entereth into the first minute of *Aries*, making equal Day and Night; and continues while the Sun is passing through *Aries, Taurus*, and *Gemini*. This quarter doth resemble growing Youth.

Of Summer. Sol in Cancer, Leo, Virgo.

THE Summer quarter doth take his Beginning when the Sun enters into the first degree of *Cancer*, which will be this Year on the 10th of *June*, and continues whilst the Sun passeth through *Cancer, Leo, Virgo*. Now the Days are longest, and the Air hottest; therefore, but for necessity, bid Physick adieu.

Of Autumn. Sol in Libra, Scorpio, Sagittarius.

AUtumn, or Harvest quarter (commonly called the Fall of the Leaf, of some the latter Spring) begins when the Sun enters into the first degree of *Libra*, again making the Day and Night of equal length, which will be this Year the 12 of *September*, and continues while the Sun passes thro' *Libra, Scorpio*, and *Sagittarius*. This quarter doth fitly resemble Declining Age, and Phlegmatick Complexion.
